Summary

Final-year Computer Science and Business Systems undergraduate with a strong foundation in Backend Development, Full-Stack Web Development, and Data Structures Algorithms in Java. Skilled in designing scalable web applications using RESTful APIs, authentication systems, and database-driven applications using the MERN Stack. Passionate about building reliable software and continuously learning Cloud, DevOps, and modern software engineering practices.

Education

B.Tech Computer Science and Business Systems

Netaji Subhash Engineering College, Kolkata

August 2023 – July 2027

CGPA: 7.2 / 10

Class 12th (WBCHSE)

Raiganj Coronation High School (HS), Raiganj

January 2021 – Feb 2022

Marks: 474 / 500 = 94.8%

Class 10th (WBBSE)

Raiganj Coronation High School (HS), Raiganj

January 2019 – Feb 2020

Marks: 652 / 700 = 93.14%

Skills

Programming Languages: Java, JavaScript, C, C++, Python, SQL

Frontend Development: HTML, CSS, React.js, Redux.js, Bootstrap, Tailwind CSS

Backend Development: Node.js, Express.js, Embedded JavaScript (EJS), MySQL, MongoDB, Mongoose ODM

Cloud and DevOps: Docker, CI/CD Pipelines, Kubernetes

Tools and Platforms: VSCode, Git, GitHub, Hoppscotch

Projects

HAVENLY: Luxury Vacation Rentals [GitHub](#) [Live Demo](#)

March 2026 – June 2026

- **Tech Stack:** Node.js, Express.js, MongoDB, Mongoose ODM, EJS (Embedded Javascript), Razorpay, Nodemailer, PDFKit, Bootstrap, Passport.js, Cloudinary, Mapbox API
- Built a travel accommodation booking platform with integrated MongoDB database for managing listings and reviews.
- Implemented user authentication, authorization, async error handling and RESTful MVC architecture.
- Added cloudinary image uploads, form validation, smart property search experience and interactive Mapbox maps.
- Integrated Razorpay payment gateway with secure HMAC signature verification and server-side price calculation.
- Implemented secure booking management, cancellation, downloadable PDF invoices and booking confirmation emails.
- Developed host analytics dashboard and designed responsive UI using Bootstrap for seamless desktop experience.

ASK-AI: OpenAI API-Based Conversational Assistant

July 2026 – August 2026

- **Tech Stack:** React.js, Node.js, Express.js, OpenAI API, JavaScript
- Built an AI-powered chatbot using OpenAI APIs for real-time conversations and prompt-based response generation.
- Implemented frontend-backend communication with REST APIs and asynchronous request handling.
- Improved user experience with clean UI and designed responsive chat interface with dynamic message rendering.
